The minimum railway curve radius is the shortest allowable design radius for the center line of railway tracks under a particular set of conditions. It has an important bearing on constructions costs and operating costs and, in combination with superelevation (difference in elevation of the two rails) in the case of train tracks, determines the maximum safe speed of a curve.

Race can also play a role in your success rate because research has shown that if you submit a resume with a "white sounding name," you have a 50 percent higher chance of getting called for an initial interview than if you submit a resume with comparable credentials from an individual with a "black-sounding name" (M. Bertrand, University of Chicago Graduate School of Business).
