Inner London is the name for the group of London boroughs which form the interior part of Greater London and are surrounded by Outer London. With its origins in the Bills of Mortality, it became fixed as an area for statistics in 1847 and was used as an area of local government from 1855 to 1965 principally as the County of London or earlier as the Metropolitan Board of Works Area (metropolis).

The term "inner city" has been used as a euphemism for lower-income residential districts in the city center and nearby areas. Sociologists sometimes turn this euphemism into a formal designation, applying the term "inner city" to such residential areas, rather than to geographically more central commercial districts. Some inner city areas of American cities have undergone gentrification ...

An inner transition metal (ITM) is one of a group (not to be confused with periodic groups) of chemical elements on the periodic table. They are normally shown in two rows below all the other elements. They include elements 57-71 (lanthanides) and 89-103 (). The lanthanides are very similar, and the actinides are all radioactive. ITMs have three incomplete outermost electron shells and are all ...
