Welcome to the complete calendar of Computer Image Analysis Meetings, Workshops, Conferences and Special Journal Issue Announcements. Includes Computer Vision, Image Processing, Image Analysis, Pattern Recognition, Document Analysis, Character Recognition. Meetings are listed by date with recent changes noted. Archives are maintained for all past announcements dating back to 1994.

### **Conference Calendar for Computer Vision, Image Analysis**

Humans perceive the three-dimensional structure of the world with apparent ease. However, despite all of the recent advances in computer vision research, the dream of having a computer interpret an image at the same level as a two-year old remains elusive.

In computer vision and image processing the concept of feature detection refers to methods that aim at computing abstractions of image information and making local decisions at every image point whether there is an image feature of a given type at that point or not. The resulting features will be subsets of the image domain, often in the form of isolated points, continuous curves or connected ...

16 Programmable SHAVE Cores. Intel's Myriad X features 4 more programmable SHAVE cores compared to Myriad 2. This additional 30% of programmable compute can be used to run traditional computer vision workloads, or can complement the Neural Compute Engine by running custom layer types for CNN applications thanks extensive support for sparse data-structures.
