An intelligent transportation system (ITS) is an advanced application which, without embodying intelligence as such, aims to provide innovative services relating to different modes of transport and traffic management and enable users to be better informed and make safer, more coordinated, and 'smarter' use of transport networks.. Although ITS may refer to all modes of transport, the directive ...

### **Intelligent transportation system - Wikipedia**

Intelligent design (ID) is a pseudoscientific argument for the existence of God, presented by its proponents as "an evidence-based scientific theory about life's origins". Proponents claim that "certain features of the universe and of living things are best explained by an intelligent cause, not an undirected process such as natural selection." ID is a form of creationism that lacks empirical ...

Artificial Intelligence (AI) techniques are now being used by the practicing engineer to solve a whole range of hitherto intractable problems. This journal provides an international forum for rapid publication of work describing the practical application of AI methods in all branches of engineering.. Focal points of the journal include, but are not limited to innovative applications of:

Published data from 2005–2016 regarding intelligent manufacturing have been gathered from the Scopus database (), which shows a steady increase in papers on this topic. Fig. 1(a) shows the published documents on intelligent manufacturing from 2005 to 2016. From 2005 to 2006, the number of articles increased sharply, from around 100 to 150; from 2007 to 2014, the number then increased at a ...
