An Introduction To Mobile Technologies and Services

Boost is a set of libraries for the C++ programming language that provide support for tasks and structures such as linear algebra, pseudorandom number generation, multithreading, image processing, regular expressions, and unit testing. It contains over eighty individual libraries. Most of the Boost libraries are licensed under the Boost Software License, designed to allow Boost to be used with ...

Interleaved Power Factor Correction (IPFC) Using the dsPIC DSC

A customization point is a code construct that the user can leverage to specialize how a particular library action is handled. A common way of implementing this in C++ is to define a template with the default behavior, and let users specialize it for their own types â€”e.g., `std::hash`â€”. This is the story of Spirit X3 and how it lets you specialize customization points without ever leaving ...
