Overview. Algorithmic information theory (AIT) is the information theory of individual objects, using computer science, and concerns itself with the relationship between computation, information, and randomness. The information content or complexity of an object can be measured by the length of its shortest description. For instance the string

In stark contrast to the Bieber-obsessed Wii-playing youth of today (and I mean that in the nicest way possible), here is a direct quote from an article written in the 1920s: "More and more the students are learning science out of school. . . . now we have kids talking about electron streams and metric wave lengths as they skate along the streets."

That's what kids used to do for fun? | I Can Has Science?

75. "Could the MBCs [Main Belt Comets; comets in the asteroid belt] be comets from the Kuiper Belt or Oort Cloud that have become trapped in asteroid-like orbits? Published dynamical simulations suggest not, having failed to reproduce the transfer of comets to main-belt orbits." Henry H. Hsieh and David C.
